LeetCode

Experience

Frontend Development Intern | Edunet Foundation

June 2024 – July 2024

- Developed responsive and interactive web interfaces using **HTML**, **CSS**, **JavaScript**, and **React**. Improved user experience by designing visually appealing layouts and implementing dynamic front-end functionalities.

Data Science Intern | Celebal Technologies

May 2025 – June 2025

- Worked on real-world data-driven projects involving **data preprocessing**, exploratory analysis, and model development. Gained hands-on experience with **Python**, **SQL** and **Machine Learning** libraries to deliver actionable business insights.

Technical Skills

- * **Programming Languages:** C++, SQL, javascript, Python, Typescript
- * **Frontend:** HTML5, CSS3, React.js, Angular
- * **Backend:** Node.js, Flask, Express.js, RESTful APIs
- * **Databases:** MySQL, PostgreSQL, MongoDB
- * **Tools & Platform:** GitHub, Docker, Postman, AWS
- * **Concepts:** Data Structures and Algorithms, System Design, Machine Learning, OOPS, Web development, Operating System, Computer Networks, DBMS, HTTP, API Design

Education

SRM University, Andhra Pradesh

Bachelor of Technology in Computer Science CGPA - 8.2/10

October 2022 – Current

Amaravati, Andhra Pradesh

Delhi Public School, Jamshedpur - CBSE

Intermideate - 81%

June 2020 – August 2022

Jamshedpur, Jharkhand

Delhi Public School, Jamshedpur - CBSE

Secondary School - 75%

May 2020

Jamshedpur, Jharkhand

LICENSES & CERTIFICATIONS:

in Complete Guide to AI and Data Science for SQL - LinkedIn

March 2026

- This certification validates skills in **Artificial Intelligence**, **Applied Machine Learning**, and **SQL**, focusing on data-driven problem solving, model building, and advanced data analysis techniques.

in AWS Certified Data Engineer Associate (DEA-C01) Cert Prep - LinkedIn

April 2026

- This certification demonstrates proficiency in **Data Engineering** and **Amazon Web Services (AWS)**, including data pipeline design, cloud-based data processing, and scalable data architecture.

Projects

SafeSphere[link] | FastAPI, React, Gemini AI, PostgreSQL, Docker, AWS

April 2026

- Built a real-time security platform to detect **phishing and scams** across **text, images, and URLs** using AI-driven multimodal analysis.
- Integrated **Gemini AI** with **FastAPI** for automated threat classification and leveraged **PostgreSQL** for persistent security analytics.
- Engineered a **Chrome Extension** to proactively scan **web forms** and page content, providing instant visual alerts before user interaction.

AgentDesk[link] | Python, Flask, PostgreSQL, React, FastAPI, NLP, Docker

February 2026

- Developed an **AI-powered** customer support platform that enables users to raise queries, receive instant automated assistance, and manage issue lifecycles through an interactive ticketing system.
- Implemented a scalable Flask-based backend with **PostgreSQL**, supporting role-based dashboards, real-time messaging, and intelligent ticket routing with priority prediction.
- Integrated **agentic AI** capabilities including autonomous query resolution, context-aware reply suggestions, and conversation summarization to improve response efficiency and reduce manual workload.

Sevak[link] | Python, React, FastAPI, RAG, LLM

June 2025

- Built an **AI chatbot** using Gemini API and RAG to assist 500+ users in making safer decisions and enhancing public safety, achieving 90%+ response accuracy and promoting public safety.
- Created a legal assistant **LLM** trained on Custome data using **RAG** and ChromaDB, aiding 300+ users with 85%+ accurate legal guidance.
- Containerized the solution using **Docker** for efficient offline deployment and scalability.

WebMiner[link] | Web Scraping, Data Visualization, Python, Flask, React, ML

March 2025

- Designed a modular scraping tool to extract key product metrics from multiple webpages using **BeautifulSoup** and a trained **Random Forest model**.
- Improved HTML tag detection accuracy to over 90% across varied **DOM structures** using adaptive learning.
- Structured a **Flask API** backend that enhanced data processing speed by 30% and maintained stable response times.
